

# PHANTOM SCREENS™

January 2018

## Ten Reasons Phantom Screens are set to Dominate

### They're Practical

Screens provide real practical benefits over blinds and curtains; helping you create a better interior environment.

### They're designed to disappear from view

Until Phantom Screens are in use, you'd hardly know they were there. Our fully retractable screens roll back into a discreet cassette, meaning they disappear from view and have minimal impact on your interior design.

### The match your existing décor

Phantom Screens can be finished in any RAL colour to match your existing door or window frames to ensure they blend seamlessly with your décor.

### They're a great solar management solution

Our solar mesh can help retain heat in the evenings while deflecting energy during the day. This improves the energy efficiency of your home, meaning you'll spend less on electricity cooling your house by day and heating it by night,

### They stop insects

No one wants flies and other bugs taking over the house. With an anti-insect mesh installed, Phantom Screens prevent insects and garden detritus from entering your home all year round.

### They provide privacy

Like the view but don't want onlookers peering in? Phantom Screens can help maintain anonymity without affecting your view.

### They're easy to maintain

There's no need for dry-cleaning - only light maintenance is required to keep them in tip-top condition.

### They're a great match for bifolds and large openings

Love the trend for large openings but don't want to ruin the space with clunky curtains? Our powered door screens are remote controlled and can be made to screen openings up to 12m wide.

### They're bespoke

Phantom Screens are made to measure and are fitted by our experts for a perfect bespoke solution.

### They come with a warranty

Screen mechanical components and motors are covered by a Limited Lifetime Warranty to help give you peace of mind.
