PHANTOM
SCREENS™

Top left:

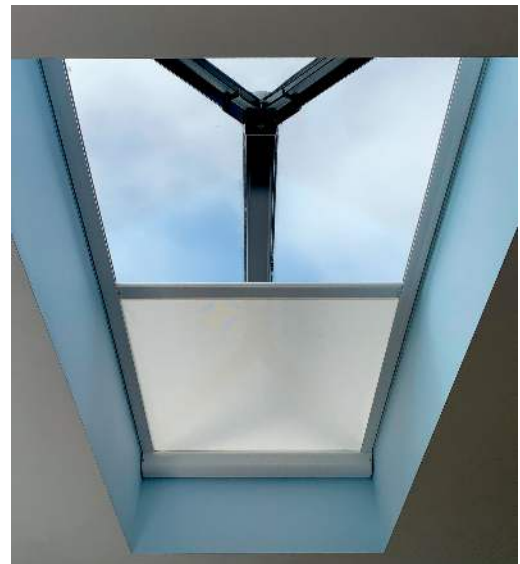

The perfect solution for sky lights - power blinds prevent glare and overheating, and as they're automated, you can control them without resorting to deploying ladders!

Bottom left:

Power blinds fitted on the outside of the property provide more effective heat control.

Bottom right:

Our power blinds are bespoke, meaning we can fit them to apex roofs, awkward shapes, and bespoke window sizes.

Fuss-free functionality

Power blinds from Phantom Screens can be operated with ease - giving you automated control over light, glare and heat. We source and fit power blinds from the world's top manufacturers to ensure we offer only the highest quality products.

All our power blinds come with the option of home automation and remote control, and are a great solution for those seeking low/no impact on architectural design. We offer tension-guided shading systems, hanging power blinds, cable-guided and track systems, and internal and external solar and privacy blinds.

FEATURES

- Options for running direction.
- RAL powder coating for visual integration.
- Blinds available up to 4.5m in width and 5.0m drop.
- Large range of fabric options and colours.
- Bespoke options for Velux windows, apex, or roof lights.

COLOURS & SIZES

All power blinds can be finished in any RAL colour to match existing decor.
